

## Self-Extermination or Moral Preservation?

it's not my business, o well." Personally, they are the same or are cowardly and don't wish to be involved, which results in a country that is taken over by hardcore psychopaths. Next time someone asks you if you are for MMA cage fighting in America, think strongly about your answer. Don't say you don't care, read this book again from the beginning and look at what is in front of you. Cage fighting is what you see, not what they tell you to influence your mind. If you want a better country and to start rebuilding a moral country, say "No, I would never be for that barbarous blood sport!" The numbers are here, and we can't be shunned any longer by the mafia's money and shady politicians.

The Government must learn better from history. Even during World War II psychologists were researching and conducting an observational analysis of Hitler and the soldiers of Nazi Germany. An important excerpt from their report is below.

*"We must discover the psychological streams which nourish this destructive state of mind in order that we may divert them into channels which will permit a further evolution of our form of civilization."* ~ A Psychological analysis of Adolf Hitler  
Office of Strategic Services (confidential) 1943

I agree with the above statement and I think most readers will agree as well. So we know today what nourishes these destructive states of mind and this country's government knew decades ago, but simply ignored it; or did they? Crime increases, people are raped and savagely killed, grade school fights increase, road rage, stalking and the cage fighting sport continues. Ask the question "why?" One answer is because not enough people put there foot down and said "enough is enough! It's our country and we do NOT want this blood sport!" That's part of it, but it's also a strong possibility that this is the form of civilization the United States Government wishes to evolve. I didn't say this is fact, but I personally believe it is very possible and have given it a considerable amount of thought. Let me explain why.

Think of Nazi Germany and contemplate to yourself why Hitler

## The Future of America:

induced in the minds of his Soldiers the conditions of superiority, no conscience, sadism, greed, violent aggression and everything else that comprises fascism. Didn't those very soldiers have 100% control of all the people? The people were terrified of them, shut their mouths, were paranoid, and listened no matter what was said or they were raped, murdered, persecuted or beaten. This 'MMA cage fighting' is a way for mass production of those same type of people that terrorized the German people in Nazi Germany and the world in the 1940s. Logically, having a psychological analysis of Hitler's Germany and understanding that if, we, the government, wish to have a mentally healthy country and care for our people, we should make certain that these character traits are NOT fed to propagate them like a virus. However, instead of doing what is 'right-minded' and proper, the US government is allowing the opposite of what the 1943 report excerpt above states. That's to say, the US government discovered the psychological streams which nourish the destructive states of mind found in the Nazi soldiers during WWII and are NOT diverting the streams, but rather feeding them through what I call the revolving door psychopathy MMA schools. So the question is why? The answers can be numerous.

The practitioners of MMA cage fighting and the fan base love aggressive violence, have no conscience and are danger to society. That's the normal, civil society of moral people I'm referring to. Therefore cage fighting psychopaths make the perfect soldiers in the current government's perspective because they will flock together when the time comes with a simple dangling of some money in front of their noses by the government for instant placement in the 'New United States Military' structure. Who were some of the most ruthless, frightening and evil soldiers of all time? It was Adolph Hitler's last wave of Nazi soldiers, the children that grew up had been trained through suggestion and repetition much longer than the rest. They were wicked sadistic psychopaths with no conscience and were among the most evil humans in history that walked this planet. Why would this government want such people?

What do you feel in your heart? Think about it and remember

## The Future of America:

I do remember a football player that killed his wife and paid lawyers a fortune. Yes he got away with murder because he had lots of money and manipulated a corrupt system. That was a disgrace to humanity and the country. That's one sport and one crazy man. One has to remember something here.

Think logically and don't allow yourself to be manipulated by sidetracking and mudslinging child games. Stick 100% to the topic regardless if a 4 year old asks you the same question I do. It's not about me, the author of this book or the 4 year old that asks the same questions or speaks the same truth. It's about the topic, the truth and the rotting source.

What is the purpose of football? I mean, what's the objective of the game? In a nutshell, not every single rule. Now what's the objective of the sport of soccer? Baseball? How about Hockey? I don't follow any sports. Not a single one, but I know them because I used to play all of them with a good friend who lived across the street from me as a child. It was a lot of fun.

Let me use this quote by co-owner of the UFC for a second time in this chapter. Please let this seep into your mind and don't forget it ever as it is coming from the horse's mouth.

*“What makes UFC (MMA) so great is that every single man on the planet gets it immediately. It's just two guys beating each other up”*  
~ Lorenzo Fertitta, UFC co-owner (Forbes, 05/05/2008)

Yes.. Yes! You're right Lorenzo, I get it! Now everyone else in America should 'get it' as well. Thanks for helping clear everything up! Please note that this comment made by Co-owner of the Ultimate Fighting Championship comes after 15 years of it being legal in the USA and before some states permitted it to be legal.

Now, I ask you what is object of the sport of cage fighting MMA/ UFC? (light bulb moment..)

Yes the object is to bash your opponents face in and to make him submit by physical fighting. Basically it's just as the co-owner of UFC stated *“it's just two guys beating each other up”* Using the sports of Brazilian Judo (jujutsu), Maay Thai, western wrestling
